

ML Lab (CS360)

Assignment 8

1. Implement SLP (one architecture) for multi-class classification task using IRIS dataset. Follow the below-mentioned instructions to implement your code.
 - a. Tune the hyper-parameters
 - b. Check overfitting issue
 - c. Finally report class-wise precision, recall, accuracy and overall accuracy considering 5-fold cross validation.

Please do not copy anyone's code. Try to learn to code.

Thank you
Happy learning
